GET YOUR BRIX FIX!®

TOTALLY MESS FREE

GLOWING GALACTIC

CONTENTS

1500+ Simbrix
2x short Simstix
5x long Simstix
3x short bar Simstix

INSTRUCTIONS

GLOWING GALACTIC

SIMBRIX is the fun, easy to build, creative 'Brix' system you can use again and again. Each set is made up of a number of 'Small builds' where you create the individual parts of the larger 3D display.

Follow the easy 'how to' guide and steps below to create your SIMBRIX Set.

CONNECT

Follow templates in the booklet to assemble designs.

Use Stimstix to build in 3D

Build designs in 3D by slotting Stimstix into the centre of a Simbrix and connecting to another design.

Follow the 3D build instructions in the booklet to make 3D displays or create your very own.

CONNECTING-SIMBRIX

CORRECT
Make sure each Simbrix is slotted in the same way.

INCORRECT
If a Simbrix is slotted in a different orientation, designs may be impossible to complete.

FINAL BUILD

FRONT

Astronaut

MIDDLE

Rocket
UFO
Moon Landing

BUILD KEY & EASY STEPS

1

BUILD EACH PART !

Follow the build template for each design, to select the right number of BRIX and build up the design.

(Build guide found on the NEXT PAGE)

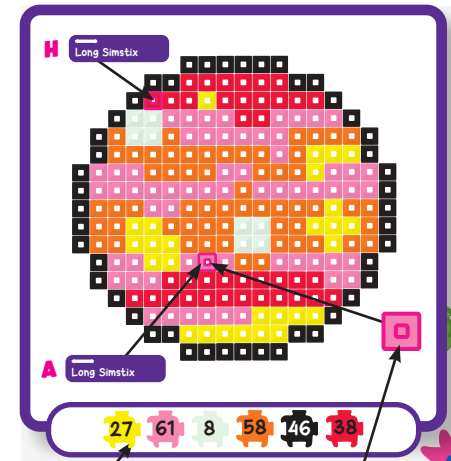

Once a build is complete set it aside and move onto another design.

NOTE: If you get stuck you can use the QR code below to download full size templates

Scan the QR code to visit the Simbrix website for ideas, tutorials and full-size printable templates

EXAMPLE BUILD TEMPLATE

Number & colour of Brix required for the design.

SIMSTIX location points are outlines with a colour and a letter for assembly.

2

USE SIMSTIX TO CONNECT DESIGNS TOGETHER !

Build 3D displays using the SIMSTIX supplied. Each build template shows the location and size of the SIMSTIX needed to connect the designs together. Each location is marked with a letter to match one end of a SIMSTIX.

For example push one end of a SIMSTIX into brix labelled C and attach the other end into the other build labelled C.

Use the image on the final build page to see placement of the 3D Build.

Once each SIMSTIX is attached the design can stand and be displayed.
