# BUILD KEY & EASY STEPS

# **BUILD EACH PART!**

Follow the build template for each design, to select the right number of BRIX and build up the design.

(Build guide found on the NEXT PAGE)

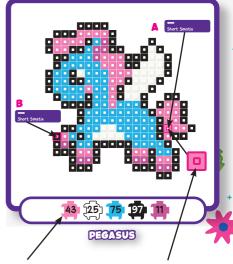

Once a build is complete set it aside and move onto another design.

NOTE: If you get stuck you can use the QR code below to download full size templates

Scan the QR code to visit the Simbrix website for ideas, tutorials and full-size printable templates

# **EXAMPLE BUILD TEMPLATE**

Number & colour of Brix required for the design.

SIMSTIX location points are outlines with a colour and a letter for assembly.

# **USE SIMSTIX TO CONNECT DESIGNS TOGETHER**

Puild 3D displays using the SIMSTIX supplied. Each build template shows the location and size of the SIMSTIX needed to connect the designs together. Each location is marked with a letter to match one end of a SIMSTIX.

For example push one end of a SIMSTIX into brix labelled  ${\bf C}$  and attach the other end into the other build labelled  ${\bf C}$ .

Use the image on the final build page to see placement of the 3D  $\operatorname{\mbox{\bf Build}}.$ 

Once each SIMSTIX is attached the design can stand and be displayed.
