CONNECTING-SIMBRIX

CORRECT

Make sure each Simbrix is slotted in the same way.

INCORRECT

If a Simbrix is slotted in a different orientation, designs may be impossible to complete.

HOW TO USE

SIMBRIX is the fun, easy to build, creative 'Brix' system you can use again and again. Simply connect the Brix together to make spectacular designs.

Slide Simbrix together to create pixel designs.

Build designs in 3D by slotting Simstix into the centre of a Simbrix.

Display play or store away designs in the Simbrix Studio.

Unclip the lid of the Maker Studio to use as a build platform. A4 templates can then be placed on top of the lid and designs can be built directly on the template.
